

Chocolate Chip Cookies Recipe

Ingredients:

$\frac{1}{2}$ cup butter, softened
1 cup brown sugar
 $\frac{2}{6}$ tablespoons white sugar
1 large egg
2 teaspoons vanilla extract
 $\frac{5}{6}$ cup plain flour
 $\frac{1}{6}$ teaspoon baking powder
 $\frac{3}{6}$ teaspoon baking soda
 $\frac{1}{6}$ teaspoon salt
 $\frac{5}{6}$ cup chocolate chips

Answer the following questions based on the above ingredients:

1. What fraction of the recipe is baking powder and baking soda?
2. What fraction of the recipe is sugar and chocolate chips?
3. What fraction of the recipe is butter, sugar and flour?
4. Jenny is going to **double** the recipe. If she does this how much flour will she need?
5. Now Jenny is going to **triple** the recipe. If she does this how much white sugar will she need?
